The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Applicant states that Benes only gives a general allegation of having parallel or in series shut with no no specific location. Applicant states that the shunt is parallel with whatever it is shunting.

These arguments are not persuasive because the combination of Javanifard and Beer already teaches a specific location of the shut, Benes teaches that the shunt can be either parallel or in series. Benes teaches that the shunt is located with a means of interest, benes does not teach away from the circuit of the claimed invention.

Furthermore, the newly added limitation introduces a new issue because it changes the scope of the claims dependent on claims 1, 38 respectively.

In addition, Leuck (U.S. 3821596) discloses an electrical circuit comprising clamping shunting diodes 44 and 45 parallel with and shunting constant currents 41 and 42 in order to regulate and control power to a load of interest.
